#1 Overview for the head of the study program

I, as a head of the study program, want to compare aggregated data on study groups, so that I can find best and worst practices to encourage students' cooperation

When no filter is applied, instruction message

All data shown refers only to the selected courses

Filters to be discussed. Logical combination of by weight, by year, by curriculum...
Search
dropdown menu/list with checkboxes
Other possibilities?

When no course is selected, instruction message

Selected course detailed data

Courses satisfying the filter

Same aggregated data as for Teachers

Selected Course

Given that a filter have been selected
When the user clicks the apply button
Then the list of courses satisfying the filter is shown and the distributions of groups, students in the groups, and students accordingly to their study plan is shown

Given that the list of courses is non-empty
When the head of the study program select a course from the list
Then the details' area is populated with the same aggregated data the course teacher can see for that course

When the head of the study program clicks the clear button
Then all data disappear and a message with instructions to select filters is shown in the top half of the page and a message "no details to show till a course is selected" appears in the bottom half of the page

#2 Teachers' overview of study groups for their course

Teachers can see statistics about the existing study groups for their courses, but they cannot see anything about courses they are not teaching.
Teachers cannot see the participants in study groups.
For each of their courses, teachers can see the number of study group created for that course, the number of groups still active, and the average number of students per group.
Moreover, for each group, they can see the number of members and for each member the number of passed credits and the average of their marks, and if they have passed the exam of the course , but not their identity.

Data

T is the teacher of courses A and B

GA1 and GA2 are study groups for course A, GB1, GB2, GB3 are groups for course B,

all active but GB3

Student	Credits	Avg	A	B	GA1	GA2	GB1	GB2	GB3
S1	30	28	☑18	☑	☑		☑		
S2	54	29	☑	☑		☑			
S3	12	22	☑25	☑		☑		☑	
S4	36	26	☑	☑	☑				
S5	72	23		☑			☑		
S6	6	20	☑	☑	☑		☑		☑
S7	66	30	☑	☑28				☑	☑
S8	84	28		☑			☑		☑

T can see the following information

A=>2 (0) - Avg# 2.5; B=>3 (1) - Avg# 3

If T selects A, the following tables are shown

GA1

Credits	Avg	A
30	28	☑
36	26	
6	20	

GA2

Credits	Avg	A
54	29	
12	22	☑

If T selects B, the following tables are shown

GB1

Credits	Avg	B
30	28	
72	23	
6	20	
84	28	

GB3

Credits	Avg	B
6	20	☑
66	30	☑28
84	28	☑

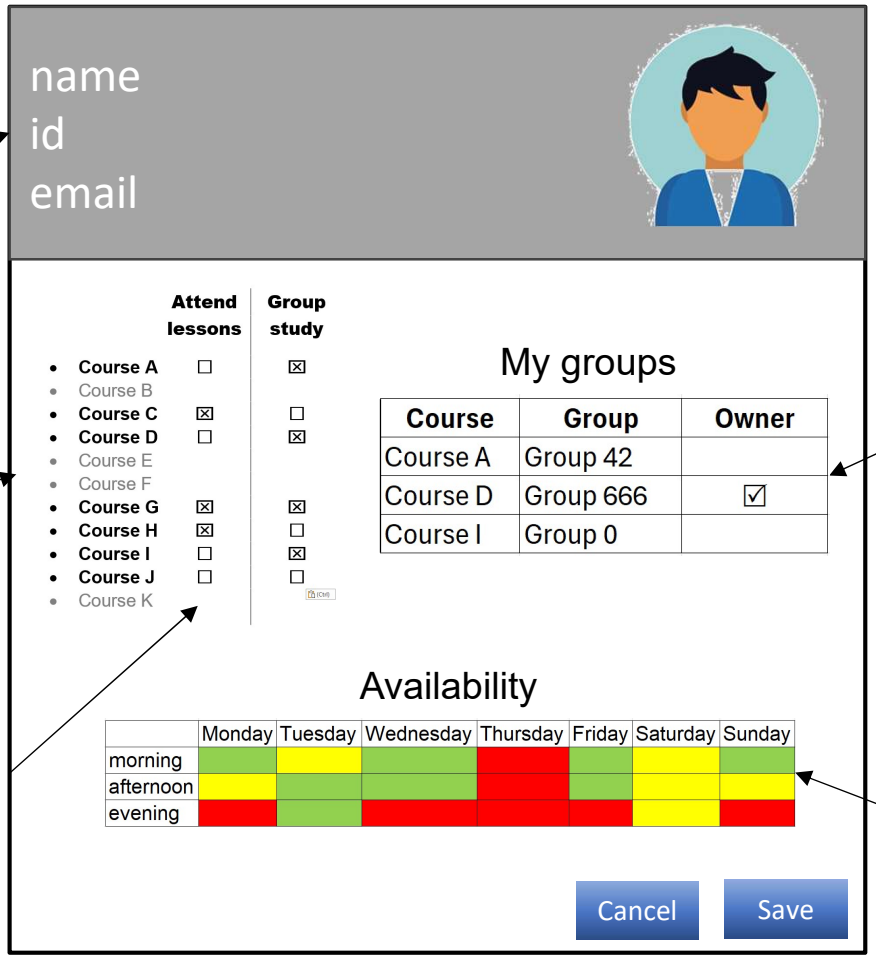

GB2

Credits	Avg	B
12	22	
66	30	☑

#3 Profile data persistency

As a student, I want my profile data to be saved on the database whenever I click the save button on the profile page, so that my data can be used to match me with other students for studying together in future sessions

Data from the University profile, which cannot be modified here

Computed, they cannot be modified

Courses from the study plan, with the exams to be taken highlighted

selected courses add constraints on availability during matching

Possible inputs: yes/no/if-need-be
Used for matching

A1: select a previously unselected choice about lessons to be attended
B: save
C: open profile again
D: check that the choice modified in the first step is still selected
Test:A1 → B → C → D

A2: unselect a previously selected choice about lessons to be attended
Test:A2 → B → C → D

A3: select a previously unselected choice about joining study groups for a course
Test:A3 → B → C → D

A4: unselect a previously selected choice about joining study groups for a course
Test:A4 → B → C → D

A5: modify the availability of a slot
DD: check that the availability is modified accordingly to A5
Test:A5 → B → C → DD

All possible combinations in different days

BB: cancel
DDD: check that the data before the changes are still there
Test:A1 → BB → C → DDD
Test:A2 → BB → C → DDD
Test:A3 → BB → C → DDD
Test:A4 → BB → C → DDD
Test:A5 → BB → C → DDD
